PrayDAO White Paper

1. The origin of PrayDAO

In 2022, from the COVID-19 to the Russian-Ukrainian war, the world is undergoing tremendous changes. In particular, the crash of the MU5735 airliner has plunged the entire society into grief, and both society and individuals are constantly experiencing suffering and death. The death of the grandmother of the project founder triggered the launch of the project from the depths of human nature.

We hope that by establishing a class of applications (PrayApp), the memory of ordinary people in this society can be preserved through the blockchain, so that the wishes of ordinary people can also be preserved on the blockchain, so that the souls of living people can be rested, and let us love People and things are forever (maybe).

The founder of the project positioned PrayApp as a kind of hybrid App program that takes users' memorial and prayer as the application scenario. PrayApp will give full play to the long-term preservation and immutability of the

blockchain, and store the people and things that users want to commemorate on the blockchain. Taking the released NFT eikons as a lasting carrier in application scenarios, through a series of interactive scenarios such as "weeding", "mindfulness", "listening to his/her story", "talking to God", "friends messages", soothe anxiety.

PrayDAO will be established as the operating organization of PrayApp. The founder of the project hopes to run PrayApp for a long time and continuously through this decentralized and distributed organization.

2. Mission, Vision and Values of PrayDAO

(1) Mission

Let every ordinary person leave a trace in this world, and let the living people get spiritual comfort. Let data not just stay on the blockchain, so that more people can reach it.

(1) Vision

Through blockchain and virtual reality technology, an eternal commemorative record of ordinary people in the

metaverse is established, and the wishes and hopes of ordinary people in the present are preserved.

(2) Values

pray for love, pray for life

3. The business ecology of PrayDAO

The purpose of PrayDAO is for the sustainable development of PrayApp and the realization of a blockchain-based memorial and prayer application.

(1) PrayApp functional scenarios

PrayApp mainly solves the bottleneck of unfriendly application scenarios of current user memorial and prayer activities. In the first year of the launch of Web3.0, the websites represented by the online cemetery are still in the era of Web1.0, and the atmosphere of the pages is gloomy and cannot be visited many times. On the other hand, online data cannot be persisted.

Therefore, PrayApp will build a class of applications that are solemn rather than gloomy, giving people love and hope, and put the people and things we want to commemorate

on the blockchain through the app for remembering people — RememberYou and the app for prayer — PrayForLife , let our wishes and hopes live forever on the chain.

1. The app for commemorating people --RememberYou

RememberYou will aim to commemorate the "disappeared" relatives and friends - allowing the deceased to be immortalized on the blockchain. The project team very much agrees with the concept in "Dream Hunting Travel Notes" that the real death of a person is that the world has forgotten him/her. So, for this he/she, we keep him/her on the blockchain and let him/her be remembered by the world.

The application will take a memorial wall (the background of the memorial wall can be replaced) as the core, and provide the on-chain storage function of the memorialized person's data (including 4 pictures, 3 audios); provide 5 NFT statue guard slots; for users Provide interactive actions such as "weeding", "listen to his/her story" and "friend messages" with relatives and friends. Turn commemorative activities from simple page

browsing to interactive activities with pictures and texts (audio) and relaxing mood.

2. PrayForLife App--PrayForLife

PrayForLife aims to pray for a certain thing and build a certain hope. Through prayer, the soul is comforted, hope is established, and the visitor is infused with the power of God.

The application will select a religion when logging in to the access page, and then be directed to the prayer interior environment page of the selected religion. In an environment with the interior of a religious prayer place as the background, it provides users with on-chain storage of 3 texts and 3 audios; provides 1-5 NFT statue guard slots; provides users and friends with "mindfulness", "with God Conversation", "Friends Message" and other interactive actions. Realize prayers based on blockchain, store wishes and hopes, and comfort the hearts of current users.

3. Other prayer-related applications

Based on remembrance and prayers, applications such as undead social networks and prayer networks are

established. Based on this type of application, buy land, build prayer places, temples, etc. in the metaverse.

4. Patronus statue (NFT) system

The end of science is theology, and the gods are the fate that human beings cannot escape. Whether it is the past, the present or the future, we all hope that we, the people around us, and things will have a good and happy life. Therefore, the gods occupy a very important position in our commemoration and prayer process.

Based on our application scenarios, we will establish an NFT statue system of various gods, and provide blessings for commemoration and prayer activities through patron statues with unique attributes.

The PrayApp application guardian deity (NFT) system will establish a 9-level deity system, from the highest-level creation deity to the lowest-level local land and mountain deity deities, to create deities with different personalities and mana for them. The upper-level creation god statue can create the next-level god statue (for example, the Tathagata Buddha can create Guanyin Bodhisattva, and Guanyin Bodhisattva can create Sun Wukong;

another example: Jesus can create Moses, Moses can create Matthew).

The core function of the eikon NFT is the blessing of application scene activities such as commemoration and prayer, such as: delaying the growth of vines (grass) in the RememberYou application scene, enhancing the popularity of the scene, and increasing the ability of the gods at the upper level to create the gods at the next level. luck value. Add the effect of prayer in the PrayForLife application scenario, and provide a topic for the interaction of "dialogue with God".

(2) PrayDAO node

1. PrayApp

PrayApp is the core of PrayDAO and the foundation of PrayDAO 's existence. Based on the operation of PrayApp , appropriate benefits can be generated through interactive activities.

2. Eikon NFT

Statues with different attributes not only have the characteristics of general NFT , but also are important

equipment in PrayApp , and an important carrier to go to the metaverse world.

3. Community

The development and operation of PrayApp will be promoted in the mode of Web3.0 . In order to maintain the sustainable development of the project, the PrayDAO community will be constructed. After the project is formed, the community will conduct self-governance and development, which can more effectively make PrayApp a spiritual sustenance . home.

4. Develop the surrounding area

For the eikon NFT developed by this project, the project party, under the premise of social laws and technology, will cooperate with temples and enterprises to develop peripheral applications and expand the value of NFT .

4. the implementation path of PrayDAO

An important feature of the PrayApp application is the long-term preservation of memorial and prayer data on the blockchain. Judging from the current technology development trend, Ethereum, as the leader of smart contracts, is easy to use, has a large number of users, and can exist for a long time. Therefore, the project party will first store the corresponding data on the Ethereum chain through smart contracts, and use the IPFS distributed file storage system for data such as pictures and audio. All eikon NFTs will mint unique ERC-721/TRC-721 tokens, and the tokens will be stored in smart contracts such as ERC20/TRC20 of NFT Token. All eikon NFT rights belong to NFT holders.

(1) Phase 1: Develop PrayApp application scenarios

PrayDAO will start the project by casting the statue of creation, and develop two application scenarios of RememberYou and PrayForLife through the funds obtained by casting the statue of creation. Based on the needs of social legal norms and technological development, users in the first phase will mainly focus on Japanese, Korean and Southeast Asian users, and establish application demonstrations similar to Move2Earn such as StepN.

(2) The second stage: establishing the PrayDAO community ecology

Based on the application of PrayApp, establish the PrayDAO community for operation, push PrayApp to the outsiders, create a PrayApp profit model, form long-term stable income, let the profit support the reliable operation of the platform, and let the people and things we care about not only stay in On the blockchain, more people can reach it.

(3) The third stage: expanding the PrayApp application market

According to the promotion and application in the early stage, PrayDAO will be promoted to the mainland and European and American markets in combination with the development of technology. Among them, when entering the mainland market, it is necessary to develop a smart contract application based on China's digital renminbi in combination with the regulatory requirements of mainland China, and expand the user group of PrayApp .

(4) Stage 4: Build PrayApp into Meta

Based on the construction of the above-mentioned stages, the PrayApp application based on the global universal metaverse application environment is developed, including but not limited to building temples and memorial walls in various game box environments, and expanding the application field.

5. Economic Model

(1) Interactive Token and Governance Token

PrayDAO will have dual Tokens, namely Interactive Game Token (SCORE) and Governance Token (HOPE).

SCORE is used for activities in various application scenarios of PrayApp, such as creating new eikons, changing the background of the scene, and upgrading the lotus base of the eikons.

HOPE, as the only token officially issued by PrayDAO, is the governance token of the PrayDAO ecosystem. It is mainly used for governance activities such as profit distribution formed by PrayApp activities and voting on the development direction and functions of PrayApp.

The supply of SCORE is unlimited, and users will generate it during the interaction process of commemoration and prayer.

HOPE is limited, with a total of 6 billion pieces.

According to the number of eikon NFTs owned by users, their attributes and the popularity of application scenarios, PrayApp will distribute them to users on a weekly basis. PrayDAO will also occasionally airdrop to users who hold level 7, 8, and 9 eikon NFTs (the creation eikon NFT is level 9).

The HOPE yield is 10% of the user's SCORE yield; for example, a user will get 1 HOPE for every 10 SCORE earned.

(2) Governance Token Distribution Mechanism

Governance Token Name: HOPE

Protocol standard: ERC20/TRC20

Release Date: 2023

Distribution platform: to be determined

Planned circulation: 6 billion

Issue price: to be determined

Distribution mechanism: All PrayDAO tokens will be used for the development, promotion and application of PrayApp,

and will never be issued additionally, 30% of which will be allocated to users participating in activities and governance. 30% of the ecological foundation is used for airdrops and community incentives. 40% for SCORE redemption for PrayApp users .

In order to ensure the healthy and long-term development of the overall ecology of the governance Token , the release of the Token will be halved every two years , or a public burning will be carried out every month.

(3) The business model of governance Token

Token 's governance rights: Token holders will have voting rights; dispose of eikon NFTs in the PrayDAO ecosystem ; decide the future of PrayApp ; and participate in different levels of PrayDAO activities according to their holdings .

(4) Reward mechanism

1. Airdrop Rewards

Users can get eikon NFT and Token rewards by participating in airdrop activities.

2. Governance Rewards

Users who hold Token can obtain Token token rewards through the governance activities of the PrayDAO system.

3. Activity Rewards

Users can get Token token rewards by participating in related activities of the PrayDAO system.

6. Introduction to the collection of NFT eikons

(1) Statue of the God of Creation

In order to reflect that God created the world, we selected 14 gods and drew their dharma images as the gods of creation. They are:

- (1) Shakyamuni;
- (2) Burning lamp ancient Buddha;
- (3) Maitreya Buddha;
- (4) Virgin Mary;
- (5) Jesus Christ;
- (6) Muhammad;
- (7) The original Tianzun;
- (8) Moral God;
- (9) Lord Brahma ;

- (10) Lord Vishnu ;
- (11) Lord Shiva ;
- (12) Zeus (Khaos/Chaos) ;
- (13) Gaea ;
- (14) Amaterasu God

This batch of creation statues will have the highest level 9 in the PrayApp system . This batch of eikons will serve as the creators of the subsequent eikon NFTs , and only those who own the creation eikons can create the next-level eikon NFTs (for details, see Chapter 3, Section 3, Guardian Deity System).

(2) Basic attributes of eikons

In order to make PrayApp playable, we designed the basic attributes of eikons with reference to the game system, including: eikons' ability value (HP), mana (MP), luck and level. The specific instructions are as follows:

(1) Energy value (HP)

The energy value of the eikon is similar to the life value of the game characters and will be automatically consumed over time. Through interactive activities (such

as: leaving a message, weeding, and mindfulness can increase energy value), or by exchanging SCORE points to increase ability value.

(2) Mana (MP)

The mana value of the eikon is the source of the guardian ability of the eikon, and the mana value gradually decreases with the deterioration of the application environment such as the growth of vines (grass). The mana value of the eikon can be increased by stacking accessories (such as diamonds, bracelets, necklaces, etc.), and the ability value can also be increased by exchanging SCORE points.

(3) Luck

The luck of the eikon provides random parameters for creating the next-level eikonNFT. In activities such as airdrops, there will be different harvests depending on the luck value. More games will be introduced in the future to increase the luck value.

(4) level

Different levels of eikons have different initial values of mana and luck.

The eikon has 1-9 levels. The larger the level number, the higher the level, the greater the initial value it has, and the higher the luck and mana value in the entire application.

(3) Ordinary eikons

The statue of creation will be sold by the project party, and then all ordinary statues will be cast by the PrayApp system through smart contracts.

Within a certain period (6 months), a creation eikon can randomly create a common eikon. Two creation eikons can instantly create new ordinary eikons after meeting certain conditions. Two ordinary eikons that reach level 7 (inclusive) or above can instantly create new ordinary eikons after meeting certain conditions.

The attributes of ordinary eikons are determined by the attributes of their created eikons plus environmental factors.

None of the information listed in this white paper has been reviewed or approved by any regulatory authority. No such action has been taken or will be taken under the laws, regulatory requirements or rules of any jurisdiction. The publication, distribution or dissemination of this white paper does not imply that applicable laws, regulatory requirements or rules have been complied with.

PrayDAO 's business and operations, NFTs , and tokens (all mentioned in this white paper) are subject to risks and uncertainties.

This Whitepaper, any part thereof, and any copies thereof may not be taken to any country where distribution or dissemination of this Whitepaper is prohibited or restricted.

Unless including this section and the following sections: "Disclaimer", "Disclaimer of All Representations and Warranties", "Your Representations and Warranties", "Cautionary Note on Forward-Looking Statements", "Market and Industry Information and Without Consent of Others", "Terms of Use", "No Advice", "No Further Information or Updates " , " Restrictions on Distribution and Dissemination " , " No Offering of Securities or Registration " and " Risks and Uncertainties " , otherwise any parts may not be reproduced, distributed or transmitted,

(1) Disclaimer. To the maximum extent permitted by applicable laws, regulations and rules, PrayDAO shall not be liable for any indirect, special, incidental, consequential or other damages of any kind (including but not limited to

loss of revenue, revenue or profit, and loss of use or data).

(2) NO REPRESENTATIONS AND WARRANTIES. PrayDAO does not make or purport to make any representations, warranties or undertakings of any kind to any entity or individual, including any representations, warranties or undertakings relating to the truthfulness, accuracy and completeness of any information set out in this white paper.

(3) Your representations and warranties. By accessing and/or accepting possession of any information in this white paper or portions thereof, you represent and warrant to PrayDAO as follows:

You agree and acknowledge that the NFTs mentioned in this white paper do not constitute securities of any kind in any jurisdiction;

You agree and acknowledge that this White Paper does not constitute a prospectus or offer document of any kind, nor is it intended to constitute an offer of securities or an invitation to invest in securities in any jurisdiction, and you are not obligated to enter into any contract or binding legal undertaking, nor will you Accept

cryptocurrency or other forms of payment based on this white paper;

You agree and acknowledge that no regulatory authority has reviewed or approved the information contained in this white paper, no action has been or will be taken under the laws, regulatory requirements or rules of any jurisdiction, and the publication, distribution or dissemination of this white paper to you does not imply compliance with applicable laws, regulatory requirements or rules;

You agree and acknowledge that the promises and/or completions of this white paper, or future transactions of NFTs on any cryptocurrency exchange, shall not be deemed by you to indicate the value of PrayDAO , NFTs (both mentioned in this white paper) ;

Your distribution or dissemination of this White Paper, any part thereof, or any copy thereof, or your acceptance of this White Paper, is not prohibited or restricted by applicable laws, regulations or rules in your jurisdiction, and to the extent that any restrictions related to possession apply , you have complied with and complied with all these restrictions at your own expense and are not responsible for PrayDAO ;

You have a basic understanding of the operation, functionality, usage, storage, transmission mechanisms and other material characteristics of cryptocurrencies, blockchain-based software systems, cryptocurrency wallets or other related token storage mechanisms, blockchain technology and smart contract technology understanding;

You agree and acknowledge that any indirect, special, incidental, consequential or other damages in tort, contract or otherwise (including but not limited to income, income or loss of profits, and loss of use or data) , neither PrayDAO nor the distributor shall be liable;

All representations and warranties set forth above are true, complete, accurate and non-misleading from the time you obtain and/ or accept this white paper or portions thereof.

(4) Cautionary Note Regarding Forward-Looking Statements.

All statements contained in this white paper, statements made in press releases or anywhere publicly accessible, and oral statements that may be made by PrayDAO or its respective members, as the case may

be , are not statements of historical fact and constitute " Forward-Looking Statements " .

Some of these statements can be identified by forward-looking terms such as "target," "vision," "anticipate," "believe," "may," "estimate," "anticipate," "if," "intend," "will," "will", "plan", "maybe", "project", "should", "will" or other similar terms. However, these terms are not the only means of identifying forward-looking statements. All statements regarding PrayDAO 's financial condition, business strategies, plans and prospects and the future prospects of the industry in which cetaceans operate are forward-looking statements. None of these forward-looking statements, including, without limitation, statements regarding PrayDAO 's revenue and earnings, prospects, future plans, other anticipated industry trends, and other matters discussed in this white paper regarding cetaceans, are not historical facts, but forecasts only . These forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause Cetacean's actual future results, performance or achievements to differ from those contemplated by such forward-looking statements, Any future results, performance

or achievements, expressed or implied, are materially different. These factors include:

Changes in political, social, economic and equity or cryptocurrency market conditions, and the regulatory environment in the countries in which PrayDAO conducts its respective business and operations;

the risk that PrayDAO may be unable or unable to execute or implement its respective business strategies and future plans;

Changes in PrayDAO 's expected growth strategy and expected internal growth;

Changes in the availability and salaries of employees required by PrayDAO to operate its respective businesses and operations;

Changes in PrayDAO client preferences;

Changes in PrayDAO 's future capital needs and the circumstances in which funds and capital are provided for such needs; wars or acts of international or domestic terrorism;

The occurrence of catastrophic events, natural disasters and acts of God that affect PrayDAO 's business and / or operations;

other factors beyond PrayDAO 's control;

Any risks and uncertainties associated with PrayDAO and its business and operations, NFTs (all mentioned in the white paper) .

All forward-looking statements made by or attributable to PrayDAO are expressly limited by these factors.

In view of the risks and uncertainties that could cause PrayDAO 's actual future results, performance or achievements to differ materially from those anticipated, expressed or implied by the forward-looking statements in this white paper, undue reliance should not be placed on these statements.

These forward-looking statements speak only as of the date of this white paper.

PrayDAO does not represent, warrant and/or warrant that PrayDAO 's actual future results, performance or achievements will be consistent with those discussed in these forward-looking statements. PrayDAO 's actual results, performance or achievements may differ materially from those anticipated in these forward-looking statements.

Nothing contained in this white paper can or may be deemed to be a promise, representation or commitment regarding PrayDAO 's future performance or policies.

In addition, PrayDAO undertakes no duty to update any of these forward-looking statements or to publicly announce any revisions to these forward-looking statements to reflect future developments, events or circumstances, even if new information or other events occur in the future.

(5) Terms used. To facilitate a better understanding of PrayDAO 's business and operations, certain technical terms and abbreviations are used in this white paper, and in some cases their descriptions. These descriptions and assigned meanings should not be regarded as definitive of their meaning and may not conform to standard industry meaning or usage.

(6) No suggestion. No information in this white paper should be considered as business, legal, financial or tax advice about PrayDAO , NFTs (all mentioned in the white paper) . You should consult your legal, financial, tax or other professional advisors about PrayDAO and its respective business and operations, NFTs (all mentioned in the white paper) . You should be aware that you may be required to

assume financial risk for any PrayDAO Tokens for an indefinite period.

(7) No further information or updates. No person is authorized or authorized to provide any information or representations related to PrayDAO and its respective businesses and operations, NFTs that are not contained in this white paper and, if provided, must not be relied upon or representations are authorized by PrayDAO or its representatives. In no event shall a token sale (as stated in the White Paper) constitute a continuing representation, or give rise to any suggestion or implication, that, as of the date of this White Paper, the affairs, conditions and prospects of PrayDAO or any facts contained in this White Paper or The information does not contain any changes or developments that might reasonably be likely to involve material changes or developments.

(8) Restrictions on distribution and dissemination. The distribution or dissemination of this White Paper or any part thereof may be prohibited or restricted by the laws, regulatory requirements and rules of any jurisdiction. To the extent that any restrictions apply, you shall notify and comply with any restrictions

applicable to your own ownership of this white paper or portions thereof at your own expense and are not responsible for PrayDAO. A person to whom a copy of this White Paper is distributed or disseminated, provides access to, or otherwise holds this White Paper shall not distribute, reproduce or otherwise distribute this White Paper or any information contained in this White Paper to any other person for any purpose, nor Such situations shall not be allowed or caused to occur.

(9) No securities or registrations are offered. This white paper does not constitute a prospectus or offer document of any kind and is not intended to constitute an offer of securities or a solicitation of investment in securities in any jurisdiction. No one is necessarily required to enter into any contract or binding legal commitment and will not accept any cryptocurrency or other form of payment on the basis of this white paper. Any agreement related to buying and selling NFTs (as referred to in this white paper) will be governed only by the terms of that agreement and not by other documents. In the event of any inconsistency between these terms and this white paper, this white paper shall prevail. We have not

taken or will take such action under the laws, regulatory requirements or rules of any jurisdiction. The publication, distribution or dissemination of this white paper does not imply compliance with applicable laws, regulatory requirements or rules.

(10) Risks and Uncertainties. Potential purchasers of NFTs (as described in this white paper) should carefully consider and evaluate the business and operations of PrayDAO , NFTs (all mentioned in this white paper) , all information contained in this white paper, and the terms before purchasing NFTs . All risks and uncertainties. If these risks and uncertainties evolve into actual events, PrayDAO 's business, financial condition, results of operations and prospects could be materially and adversely affected. In this case, you may lose all or part of the value of the NFT .
